

Clean act for the environment

Kiilto Pro Natura

Kiilto Pro Natura is a high-quality product line for professionals. The series was born from a natural cycle of raw materials without unnecessary load to the environment. Natura is a marking that indicates sustainability and that the raw-materials used are biodegradable. All products in the Kiilto Pro Natura -line are fragrance-free.

HOW NATURA PRODUCTS ARE MADE?

In the development of Natura products the whole lifecycle has been considered from raw materials to production, use, disposal and recycling. High requirements are set not only on environmental goals but also on safety and quality.

The products are manufactured of renewable raw materials without unnecessary load to the environment instead of using raw materials coming from petrochemical sources. The best choices have been made with Kiilto Pro Natura.

KIILTO PRO NATURA **PRODUCT RANGE**

The Natura series includes products for daily cleaning of various spaces, including cleaning glass and mirror surfaces, spas and swimming halls, dishwashing, oil and grease removal and cleaning surfaces in professional kitchens. The product line is constantly growing.

Products specially for kitchens

WHAT CAN WE DO FOR THE ENVIRONMENT?

When choosing a product, make sure that the raw materials and the production won't cause unnecessary load on the environment.

Always follow the dosing instructions, since correct dosing has a huge impact on the climate.

Recycle everything that is possible to put back into the circular economy cycle.

MAKING A **BETTER CHOICE** FOR THE FUTURE

All of the Kiilto Pro Natura -products that have the criteria for Nordic Ecolabel set, have been granted the certificate. The Nordic Ecolabel means that the products are environmentally conscious and their climate impact is minimal for their entire life cycle.

Most of the products also carry the Finnish Allergy, Skin and Asthma -federation certificate. The certificate states, that the product is safe to use and that it does not contain any perfumes nor other possibly irritating ingredients for sensitive people.

**KiILTO
PRO**

Sustainable **packaging**

Packaging materials have a large impact on the size of a product's carbon footprint. Recycled plastic reduces the use of natural resources when the material is reused.

As a pioneer in Finland, Kiilto has developed plastic packages made of recycled plastic for professional cleaning products

- 1 litre and 750 ml packages used in the Natura series are made of 100 % recycled plastic.
- 5 litre canisters are made of 35 % recycled plastic.
- The aim is to increase the use of recycled plastics all the time.
- All packaging used in different package sizes in the Natura series is fully recyclable.
